

# ERADICATE DOWNTIME AND DATA LOSS

## HERE'S WHAT YOU GET

Near-Zero Downtime with a 15 minute failover guarantee

90% Disaster Recovery Savings – Lower TCO than competitors

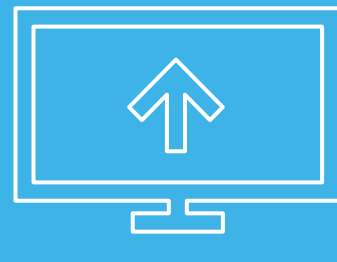

Operational Savings with a Single, On Demand Backup and DR platform

## WITH INFRASCALE DRAAS YOU CAN

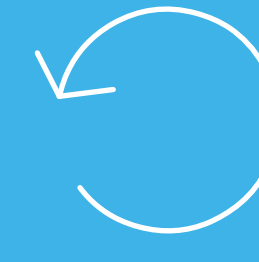

### Deploy in Any Form

Agent software, on-premise appliance, virtual appliance

### Backup Any Device

Physical and Virtual Servers, workstations, laptops, and mobile devices

### Recover Anything

Running machines, applications, disks, folders, and files.

### Store in Any Cloud

**Infrascale Cloud:** Replicate to one of our 12 geographically dispersed data centers  
**Private Cloud:** Deploy to your private cloud  
**Third-party clouds** (i.e. AWS or Windows Azure)

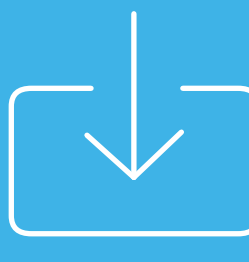

### Guaranteed 15 minute Failover

Minimize downtime with push-button failover so you can boot systems and servers in the cloud or from a local appliance. Supported OS include: Windows, Linux, VMware, and Hyper-V

### Increase Data Security

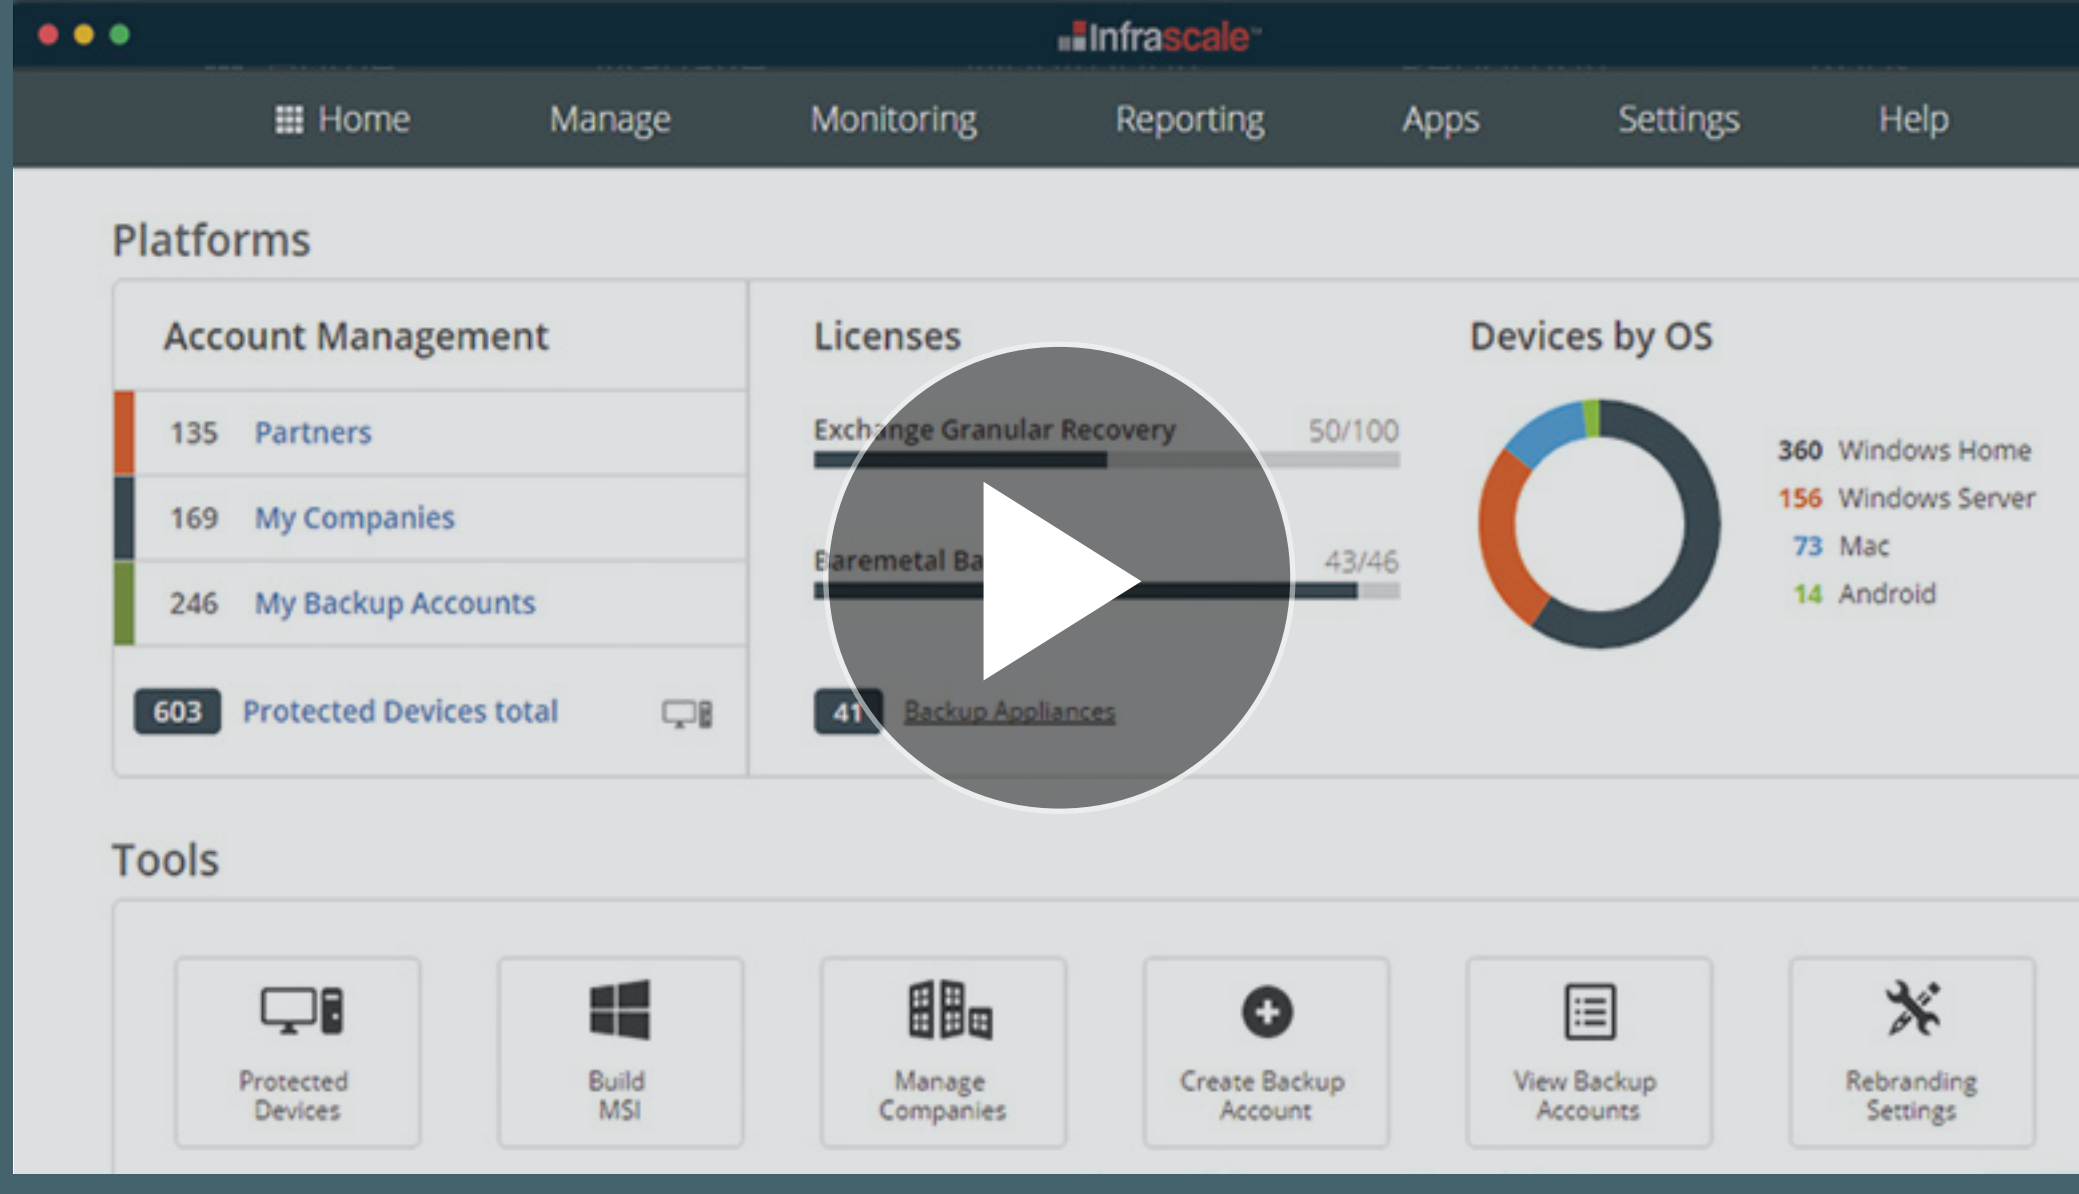

- Data is encrypted with the user's key (optional)
- Data is sent through tunnel with AES-256 encryption
- Data remains encrypted at rest within the data center

### Failback any system

VMs, applications, servers, and networks back to your primary environment

**Gartner**

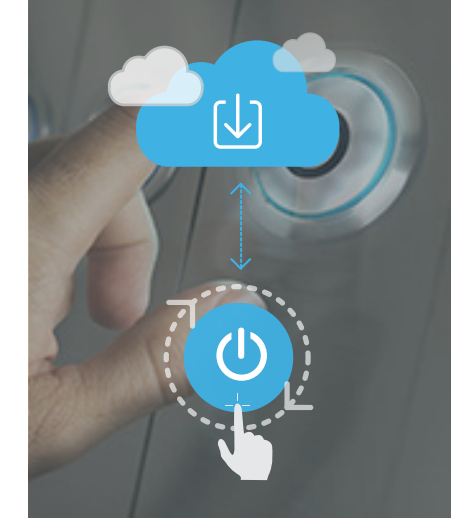

**VISIONARY**

Disaster Recovery as a Service (DRaaS)

### Meet Cloud Spillover

Revolutionary DR software allows you to keep your appliance lean with only the most critical applications so that you have plenty of space to land and virtualize the VMs on the appliance. It's how you avoid buying a big appliance and forklift upgrades.
